DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

1. Claims 1, 3, 4, 5, 6, 7 and 10 rejected under 35 U.S.C. 102(e) as being anticipated by Nakamura et al. (6,342,933).

Regarding Claims 1, 3, 4, 5, 6, 7 and 11, Nakamura et al. disclose a liquid crystal display including driving circuit held between convex portion and elastic pressing portion formed on two box members. Liquid crystal display includes a metal box member, a mold member with a back light source, and the driving circuit substrate for driving the liquid crystal panel held by these two cage bodies, where the driving circuit substrate is held between a convex portion formed in one of the two cage bodies and an elastic pressing portion formed in the other box member, the driving circuit substrate is grounded to the metal box member through this holding portion and the driving circuit substrate is held without being secured.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakamura et al. (6,342,933) in view of Terao et al. (6,342,932).

Regarding Claims 2, 8 and 9, Nakamura et al. disclose all the claimed subject matter except they fail to disclose the required both holding members being elastic. However, Terao et al. disclose a liquid crystal display device where the required elastic combination is shown.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required elastic combination in Nakamura et al. as taught by Terao et al. in order to have a liquid crystal display device with better flexibility.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fazli Erdem whose telephone number is (703) 305-3868. The examiner can normally be reached on M - F 8:00 - 5:00.
